

# THE RULES OF THE GAME

## Places, Please

**2 to 6 players**

**You will need:** 1 die ■ a game board for each player (see page 31) ■ pencils ■ score sheet (see page 70)

*Winning in a Nutshell*

Place four digits in the four slots to make the highest possible number.

### The Way to Play

1. Player 1 rolls the die, announces the number, and says, "Places, Please."

2. Each player writes the number in any space on his or her game board. The first four spaces are place values: thousands, hundreds, tens, and ones. The fifth space is garbage—a place to throw out one number. Once you write in a number, you can't move it. Choose carefully!

First Roll:

3. Player 2 rolls the die, announces the number, and says, "Places, Please." Again, write the number in any open space.

Second Roll:

4. The next three players roll in turn. After the fifth roll, each player should have a four-digit number and one number in the garbage.

Third Roll:

Fourth Roll:

Fifth Roll:

5. The player with the highest number earns 5 points. (If two players tie, they both earn the points.) The player with the next highest number earns 3 points. The player with the third highest number earns 1 point. Record the scores on the score sheet.

6. Player 2 rolls the die to start the next round.

7. The high scorer after six rounds is the winner.
